National Mapping Bureau

Purpose:

To provide an accurate and reliable Geographic Information Service (GIS) to Government agencies and other stakeholders by producing a range of high quality standard maps and related products from reliable data at affordable prices.

Key Activities

- Provide Accurate Topographical Data, Maps And Other Related Products To Stakeholders
- Provide Accurate And Reliable Administrative Boundary Mapping And Charting Service For Stakeholders, Including International Borders
- Provide accurate and reliable infrastructure Mapping Service for stakeholders
- Develop And Implement a Product Marketing And Sales Plan to increase revenue from NMB Products
- Provide And Market Range Of GIS Related Products, Document Preparation Services, Technical Advice And Training To appropriate Stakeholders

Our Services:

1. Standard Mapping

This section is responsible for the digitization and compilation of standard large and small-scale maps.

- Provincial and District Maps
- Standard Topographic Maps for the Country

2. MAP Revision Services

The type of products produced:

- Photo Mosaic Maps
These are made up from recent black and white aerial photography and cover towns and administrative centers in PNG
- Aerial Photography
- Satellite Imagery

Aerial photography has a multitude of applications and can be used in urban and regional planning, asset management, primary industry and natural resource management. Images are available in a range of formats and can be overlaid with other mapping information from NMB to develop customized products. The Bureau has complete coverage of PNG with black and white photography taken between 1973 and 1975 (Skai Piksa series).

3. Map Sales

The Bureau sells a wide range of paper products, and provides other mapping services to land information industry. It also provides new products for Planning and Management purposes at Provincial and District levels.

TOPOGRAPHIC MAPS

These maps depict both natural and man made features such as roads, vegetation cover, water features, populated areas and relief as portrayed by contours. These maps are available at different scales:

LITHOGRAPHIC SERVICES:

- Printing
- Printing of aerial photography
- Scanning & Image Processing
- HP Plotting (Black and White)

Digital products, Price List & Service Charges

1. PNG Gazetteer	
• Gazetteer 98	K500
• Administration boundaries	K250
• GPS Airstrips	K250
• PNG Coastline incl.international Boundaries	K100/set
2. PNG Digital Cadastral Data Base	K1.00/parcel
3. Scanning and Cleaning using Eagle AO Scanner	
<i>Topo Maps 1: 100,000 & 1: 50,000 scale series</i>	
• Scanning/cleaning average sheet	K430/sheet
• Scanning/cleaning theme/layer	K130/theme/layr
• Scanning only theme/layer	K100 theme/layr
3.2 Batch Vectorising	
• Batch Vectoring (no vector edit)	K430/sheet
• Registration of Themes	K45/hour
4. Vectorising; feature coding; editing& polygonising	
<i>Topographical Maps 1:100,000 & 1: 50,000 scale series</i>	
• Average Sheet	K2,500/ sheet
• For a theme/layer	K655/layer/them
<i>Special Thematic Maps—TPS 1: 500,000 scale series</i>	
• Provincial TPC	K250/province
• PNG TPC	K2,500/(less vill)
5. Digital Terrain Models	
• Contour Tagging	K600/sheet
• DTM creation & report	K250/sheet
6. Photo Mosaic Map 1:20,000 scale-semi controlled (color)	
• Digital Image (Tiff file)	K1,030/sheet
7. Image Maps 1: 50,000 scale	
• Digital Image (Tiff file)	K2,030/sheet
8. GPS Price Schedule	
• GPS Roads (new surveys hire Transport & services of GPS operator)	K2.00/km
• GPS Village locations	K2.00/km
• Ashtec Z-12 Geodetic accuracy GPS	K300/day
• Ashtec Reliance GIC GPS	K200/day
• Operators	K400/day
9. Satellite Images	
• Spot Image (full scene)	K200/image
• Landsat Image (quarter scene/eqv)	K200/image
• Landsat Image (full scene)	K500/image
